REQUEST FOR RECONSIDERATION/OTHER

See Continuation Sheet.

11. 

The request for reconsideration has been considered but does NOT place the application in condition for allowance because:

12. Note the attached Information Disclosure Statement(s). (PTO/SB/08) Paper No(s).

Continuation of 11. does NOT place the application in condition for allowance because: Applicant amendment filed on 12/21/2007 has been considered but they are not persuasive.

In the remarks, applicant argued in substance:

- (1) " Hallenbeck does not disclose or suggest, in or any where in the disclose, inter alia " genering a file by the input control such that a format of the generated file depend on manufacturer of an application".
- (2) "Hallenbeck does not distingguish betweeen the different types of applications".

Examiner respectfully traversed Applicant's remarks:

As to point (1), Bione teaches a user enters information into a user interface 242. Interface 242 may typically be a keypad, but may also comprise a keyboard of a personal computer, a personal digital assistant, or even a telephone keypad. The information input by the user into interface 242 is received by data generator 244 that generates an instruction message to be transmitted to a receiver (para [0049], In 7-13), and Hallenbeck teaches can receive a packet that is formatted to direct a change in a state of the output. If the output is connected to premises-based apparatus, such as a heating system, appliance, or security system, the change in state of the output might be effected[depend on] to communicate with the premises-based apparatus, para[0008], In 1-9)/ the output packet is sent over the network, addressed and formatted to direct the change of state as required. In many cases this change of state is designed to effect[depend on] communication with premises based apparatus such as security systems, lighting systems, or HVAC controllers[a manufacturer of an application], para[0067], In 33-39)/ the change in the state indicated in the packet in order[depend on] to communicate with the premises-based apparatus[a manufacturer of an appliance], left col 12, In 41-43)/ since the packet must be formatted in order to communication with a premises-based apparatus, format of the packet depends on the premises-based apparatus.

As to the point (2), "not distingguish betweeen the different types of applications" was not in the claim.
